Abstract (en)

[origin: WO2012163410A1] The invention concerns an apparatus for cleaning delicate textiles, comprising a motorized and rotating drum (1) housed in a fluid tight basket (2), at least a water inlet (20) and a fluid outlet (11), at least a first container (5) for a first chemical composition, and a heating means (4). According to the invention, the first container is appropriate to contain a warm mixture of water and the said first chemical composition, the apparatus comprises at least a conduit (51, 52; 53, 54) cooperating with a circulating means (6; 61, 62) for mixing and circulating the said warm mixture between said first container (5) and said circulating means, a means (7; 8,9) for injecting or spraying said mixture into said drum (1) and over dry textiles, said circulating means (6; 61,62) having an inlet for said warm mixture and at least an outlet cooperating with at least a first end of a conduit (71, 72) opening at its second end into the drum (1). The invention further relates to a method implemented by such an apparatus.
