Abstract (en)

[origin: WO2012164463A2] The invention relates to a base for an ironing station for setting down an iron, comprising an accommodating space for accommodating an electrical cable, wherein the accommodating space is open on opposite sides and at least one body section for inserting an insert module having a cable drum is integrated in the wall of the accommodating space. The invention further relates to a housing part for integrating a cable drum in such a base and to an ironing station having an iron and having such a base. The invention is suitable in particular for providing an ironing station for flexible use with a loose electrical cable or an integrated cable drum.
