Abstract (en)
[origin: WO2012152994A1] The invention relates to a building system resulting in a building element comprised of a building board made, for example, from a plaster or paper mixture and intended to be fixed to studs when making walls. The building board is of a small building board size, such as 900 x 1200 mm, and partly provided with a double groove and tongue joint or entirely provided with a double groove and tongue joint, being glued to the stud and at the groove and tongue joint, handled by a high-lift handtruck, nailed using dyckert nails.
