Abstract (en)

[origin: WO2012163569A1] In various exemplary embodiments, an optoelectronic component (500) is provided. The optoelectronic component (500) can comprise at least one layer (100, 200, 300) of the optoelectronic component (500); at least one adhesive (504) on the layer (100, 200, 300) of the optoelectronic component (500); and a cover (506) on the at least one adhesive (504); wherein the at least one adhesive (504) is cured only in a partial region (508) above a substrate (502) and/or above the layer (100, 200, 300).
