Abstract (en)

[origin: WO2012163713A1] The present invention relates to a test and connection apparatus arrangement, having a test apparatus, and having a connection apparatus for connecting electrical conductors, wherein the test apparatus can be plugged into the connection apparatus and, in the process, disconnects an electrical connection between two contact lugs which are electrically in contact, and wherein the test apparatus can be plugged into the connection apparatus from a top face of the connection apparatus and from a bottom face of the connection apparatus. The present invention also relates to a connection apparatus which is designed for connecting electrical conductors.
