Abstract (en)

[origin: WO2012163547A1] The invention relates to a locking device for fastening a connection element (2) to a housing (1) of a connector arrangement with a substantially U-shaped spring element (7). The spring element (7) comprises a first limb (9a) and a second limb (9b) that is arranged substantially parallel to the first limb (9a) in a state of rest of the spring element (7), wherein the first limb (9a) is longer than the second limb (9b).
