Abstract (en)

[origin: WO2012159144A2] The invention relates to a distributor comprising a power connection having a plug (1) and being connected to at least two socket pin holes (3) via an electric conductor (2). In order to allow highest possible variability with respect to the distributor length, the socket pin holes (3) are associated with separate sockets (4) which can be detachably interconnected or detachably connected to a housing (6) and which each are connected one to the other or to the housing (6) via an extension lead (5).
