Abstract (en)
[origin: EP2716171A1] The device has a receiving element (10) provided with an outer side at which a receiving portion is formed. A conveyor is located on an inner side with which the receiving element is provided on an outer side (2a) of a movable body (2). A fastening unit is adapted for releasably securing the receiving element on the outer side of the body. A position-defining element is attached to the receiving element and is formed for engagement with the body of the conveyor. A projection is formed on the receiving element for engagement with a fitting recess (14) in the body of the conveyor.
