Abstract (en)
[origin: EP2716184A1] The suit (1) has an upper part (11) covering a torso, a hip, a pelvis and arms of a wearer. A lower part (12) covers legs of the wearer, and is connected to the upper part. Straps (14, 24) are fixed on an inner face (11b) of the upper part for passing around a neck of the wearer to hang the suit. A length of the straps is adapted so that the suit is provided above a ground without touching while the inner face of the upper part and an inner face (12b) of the lower part falling towards the ground are handled by the wearer for enabling to thread the suit when the suit is hung around the neck. An independent claim is also included for a method for dressing a clean room suit.
