Abstract (en)
[origin: EP2716826A1] The channel has a U-shaped trough portion (2) with a sole whose both sides are limited by wall flanges (13). Two side wall portions (3) are plugged on the wall flanges reciprocally such that the side wall portions form U-shaped drainage channel main portion in the trough portion. The side wall portions are connected to the trough portion by stepped joining such that the side wall portions are guided in degrees of freedom of relative movement with respect to the trough portion and is locked in connection location.
