Abstract (en)  
The illumination module (1) has a light source and a power connection for supplying the light source. The illumination module has a cooling element (8). The light sources are arranged at a front side of a circuit board (6). The cooling element is connected with a rear side of the circuit board. The cooling element is attached to the circuit board by an adhesive. The illumination module has a cover (7), which is made of plastic or metal. An independent claim is included for a chain of lights with two illumination modules connected in series.
