Abstract (en)  
[origin: EP2716963A1] The arrangement (1) has a box reflector whose upper side is formed with a circular central light inlet opening, and two reflecting elements (11) provided in the reflector below the opening. The reflecting elements are extended in a longitudinal direction of the reflector in both sides of a longitudinal central plane of the reflector. The reflecting elements are inclined opposite to the plane such that upper ends of the reflecting elements are extended adjacent to each other and directed to side wall reflectors (3) provided on side surfaces of the reflecting elements reflected from each other. An independent claim is also included for a light for generating a light image.
