Abstract (en)

[origin: WO2012168165A1] The invention relates to a method for controlling and/or preventing a fire in a vehicle air-conditioning system which contains 2,3,3,3-tetrafluorprop-1-ene as a coolant. Said method is characterised in that at least the components of the air-conditioning system containing the coolant are brought into contact with an extinguishing agent which contains an aqueous solution or suspension of a compound containing calcium and a gelling extinguishing agent additive.
