Abstract (en)

[origin: WO2012167850A1] The invention relates to a clamping device for a hand-held power tool, in particular a clamping device for an oscillating hand-held power tool, comprising at least one clamping unit (12a; 12b; 12c) for clamping a processing tool (14a; 14b; 14c) in an axial direction (16a; 16b; 16c) and at least one operating unit (18a; 18b; 18c) for actuating the clamping unit (12a; 12b; 12c). According to the invention, the operating unit (18a; 18b; 18c) has at least one jaw coupling element (20a; 20b; 20c) for coupling the operating unit (18a; 18b; 18c) to the clamping unit (12a; 12b; 12c) in a rotationally fixed manner, the jaw coupling element being supported so as to be movable at least substantially parallel to the axial direction (16a; 16b; 16c).
