Abstract (en)

[origin: WO2012137007A1] A system for securing a portable computing device, such as a tablet computer, in a retail environment. The system comprises: (a) two or more slideable arms that each terminate in a jaw, each jaw adapted to grip a side of the computing device; (b) a hub unit into which each arm can slide and which lockably secures each arm in position. The slideable arms can each be slid into a position to grip a computing device of any dimensions.
