Abstract (en)
[origin: WO2012168243A1] Orientable screwed element (1) comprising a cover (11) and a device for adjusting the angular orientation of said cover (11) with respect to a watch middle (3). The device for adjusting the angular orientation comprises a coupling member (5) and means (551,91) of indexing between the cover (11) and the coupling member (5), as well as return means (4) which tend to keep the cover (11) and the coupling member (5) joined together in terms of rotation.
