Abstract (en)
[origin: WO2012168194A1] The subject matter of the invention is a cable connector (1) for electrically connecting an electric vehicle to a charging apparatus, wherein the cable connector (1) is designed to form an electric connection to a device connector (2) associated with the electric vehicle or the charging apparatus, the cable connector (1) has a latching means (4) which is designed in such a manner that a pair of cable connectors (1) and device connectors (2) connected to each other can be latched to each other by means of the latching means (4), and the cable connector (1) has a counter-contour (10) which is designed in such a manner that a locking means (8) associated with the device connector (2) for locking the latching means (4) against being unlatched can be prevented from being unlocked by the counter-contour (10).
