Abstract (en)

[origin: EP2720093A1] The system has a watch case (18) which comprises a case band (20) and a back cover (26). A link comprises a hollow element (12) and an element (14) partly nesting in the hollow element. The hollow element is provided with a fastening unit (28) for fastening to the watch case. The element is provided with a fastening unit (30) for fastening to an adjacent bracelet link (16). The watch case is provided with a mechanical device arranged to pivot the hollow element so that the hollow element is pressed against the case band of the watch case.
