Abstract (en)

[origin: WO2012172096A1] The subject of the invention is a device (1) for applying a haircare product to locks, having an applicator means (2) in a container (20) and a holding member (4) that is able to engage with the applicator means (2) in order, when the device (1) is moved longitudinally in relation to a lock, to hold said lock in contact with the applicator means (2), said applicator means (2) comprising an applicator end piece (30) mounted on the container (20) and comprising an outlet orifice (31) equipped with an opening/closing element (32) which, in a first position, closes off said outlet orifice and which, in a second position, at least partly releases said outlet orifice.
