Abstract (en)

[origin: WO2012172198A1] The installation for transport by overhead cable includes an embarking station (1) and a disembarking station (2) for passengers; and a plurality of vehicles (3) mounted on a hauling cable (4) between the embarking station (1) and the disembarking station (2), said vehicles being intended to move along a loop that passes through the embarking station (1) and the disembarking station (2), each vehicle (3) including a seat (5) and a guard rail (6) designed to take up an open position in which access to the seat (5) is enabled, and a closed position for protecting a passenger seated on said seat (5). It also comprises electronic means (7, 8, 9, 7', 8', 9') for detecting the presence of a passenger seated in the seat (5) and the position of the guard rail (6).
