Abstract (en)

[origin: CA2838635A1] The invention relates to a crash absorber arrangement for rail vehicles, particularly streetcars, having: - a first impact absorber element (50), - a second impact absorber element (52) that is connected to the first impact absorber element (50) in a first operating state, in which it is ready for absorbing impact energy, - and a crash element (51) that is connected to the second impact absorber element (52), the arrangement having a movement apparatus (20) with which the second impact absorber element (52) can be moved, and the movement apparatus being designed to disconnect the second impact absorber element (52) from the first impact absorber element and to bring the arrangement into a second operating state, which is suitable for a coupling operation of the rail vehicle.
