Abstract (en)

[origin: WO2012173472A1] A vessel (1) for installing a platform (2) on an offshore support structure (3) comprises a floating body (4), a lifting device (5) which is tiltable about a tilting axis with respect to the floating body (4) and a tilting force member (1Q) for applying a tilting force to said lifting device (5). The lifting device (5) is provided with a static part (6) that is tiltable about the tilting axis and a movable part (7) which is movable in vertical direction with respect to the static part (6). The tilting force member (10) engages a drive location (11) at the static part (6).
