Abstract (en)
[origin: WO2012177209A1] A substantially cone-shaped tent (1) comprises a substantially cone-shaped tent cloth (2) to assume substantially the shape of a cone when the tent is pitched. The tent cloth is separable in at least lower part for forming an opening (10) to pass in and out through. The tent is provided with means configured to enable rain diverting, releasable attachment of an additional cloth (11) with respect to said substantially cone-shaped tent cloth in a region of said tent cloth above said opening for together with said tent cloth when said opening is present forming a cover over the ground (13) substantially covered by the tent cone defined when said opening is closed.
