Abstract (en)
[origin: WO2012172047A1] The invention relates to an input means which comprises at least one electrically non-conductive substrate, an electrically conductive surface that is present on the substrate, an electric conductor, a control unit for electrically connecting the surfaces, and an energy source. At least one electrically conductive surface is electrically connected to the control unit via at least one conductor. The invention further relates to a system comprising the input means and a touchscreen. The invention also relates to a method for inputting data on a touchscreen and to the use of the input means for authenticating purposes, authorizing purposes, and/or inputting data.
