Abstract (en)  
[origin: WO2012171592A2] The present invention relates inter alia to a method which encompasses the control of the use of energy that is produced by one or more energy generators in a home network, at least according to a forecast of the energy that will be produced by the energy generators in the home network and/or according to a forecast of the future energy requirements of one or more energy consumers in the home network. The present invention further relates to a device and a computer programme.
