Abstract (en)  
A dishwasher of the present invention includes washing tub (2), washing pump (5), and wash nozzle (15). Wash nozzle (15) is composed of first arm nozzle (6) and second arm nozzle (7). Second arm nozzle (7) has its rotation center at a position decentered from the rotation center of first arm nozzle (6), is provided on first arm nozzle (6) through hook-and-catch locking part (8), and has multiple washing water spray openings (11). Second arm nozzle (7) has at least one washing water spray outlet (12) directly above rotation shaft (7a), on top surface (7c) of second arm nozzle (7), thereby preventing hook-and-catch locking part (8) of second arm nozzle (7) from detaching due to a dynamic water pressure of washing water pressure-transferred.
