Abstract (en)

[origin: EP2722177A1] The device has a removable squeegee holder (19) attached to a support (17). The support has a receiving surface for receiving the holder. The holder has a fastening plate (43) for fastening of the holder on the receiving surface in a printing position in which a scraping direction (35) of the squeegee extends along a printing direction. An alternative fastening plate (45) fastens the holder on the surface in an alternative printing position in which the scraping direction extends along an alternative printing direction distinct and separate from the printing direction.
