Abstract (en)

[origin: EP2722214A1] A device for manual control of the accelerator of a motor vehicle, in particular for disabled drivers, comprising a mobile actuating member (1) operatively connected to an electrical or electronic system for actuating the accelerator. The mobile member (1) is configured for being removably and stably applied to a finger (T) of a hand (H) of the driver and is connected to a resting base (3) that can be positioned against a reaction surface preferably constituted by the steering wheel (W) of the vehicle.
