Abstract (en)
[origin: EP2722440A1] The profile element (20) has an arrangement surface (28) which is arranged to a rail, and a contact surface (30) opposite-lying to the arrangement surface. The profile element has a material which has material properties. A functional area (40) is provided in a cross-sectional surface viewed in a longitudinal direction (L) of the profile element. The functional area is formed at the contact surface in a sectional manner. An independent claim is included for a track system with a concrete plate.
