Abstract (en)  
Refrigerator (30) includes heat-insulating box body (31) formed from inner box (33), outer box (32), and a heat-insulating material filled between inner box (33) and outer box (32), and a storage compartment provided in heat-insulating box body (31). In addition, refrigerator (30) includes partition wall (41) vertically partitioning the storage compartment, an openable door provided on an opening of the storage compartment, and metal receiving member (42) provided at the door side of partition wall (41). Refrigerator (30) further includes door gasket (90) in close-contact with metal receiving member (42), and independent opening-side space (50) provided in a front opening of the storage compartment and separated from a space inside the storage compartment.
