Abstract (en)

[origin: WO2012175881A1] The present invention relates to a topical film-forming composition for the treating dermatophytosis, specifically mycoses of the feet and, in particular, for treating the symptoms associated with dermatophytosis, specifically the symptoms associated with athlete's foot. The composition is particularly suitable for treating cracking, and for promoting the healing of skin lesions caused by said inflammation. The present composition is also suitable for preventing bacterial or fungal proliferation in the damaged skin.
