Abstract (en)

[origin: WO2013000880A1] The invention relates to a sliding closure for a metallurgical casting vessel, in particular a casting ladle, comprising a slide plate (3) movably supported between a head plate (5) and a pouring plate (6), wherein all three plates (3, 5, 6) are arranged within a slide housing (1) that can be opened if necessary, and wherein the slide housing (1) can be sealed off from the outside in a substantially gas-tight manner (circumferential seals 15, 22, 33).
