Abstract (en)
[origin: EP2725157A2] The joint plate (30) has an elongated plate (31), which is fitted in the two concrete components along the construction joint with minimum embedment depths (E1',E2'). The elongated plate is provided with a marker (32,33) for marking the minimum permissible embedment depths along the embedment depths. The markers are colored markers and are formed in a stripe shaped manner. The joint plate has a L-shaped cross section, whose wider side is formed by the elongated plate.
