Abstract (en)

[origin: EP2725180A1] Screen device comprising a screen roller (1) with a screen (2) which can be rolled up and unrolled, the screen device further comprising two lateral guides (6) for guiding the lateral sides of the screen when the screen is rolled up and unrolled, wherein the screen roller (1) is retained by at least one guide element (4) compatible with the at least one of the lateral guides (6) such that the guide element (4) is movable along the guide (6), and wherein a mounting accessory (12) is provided to secure the guide element (4) relative to the guide (6) in a predetermined operating position of the screen device.
