Abstract (en)
[origin: WO2013001337A1] The present invention relates to a clasp having a folding buckle for a bracelet in order to adjust the length of the bracelet. This clasp comprises: a central support (1); a first and a second pivoting leaf (2a, 2b) which are articulated on the respective ends of the central support (1) and being able to be folded over the latter; means (14, 16, 17, 19, 22) for closing and opening the clasp, said means being arranged so as to lock the first and second pivoting leaves (2a, 2b) against the central support (1) and to unlock said first and second pivoting leaves (2a, 2b) from the central support (1) in order that they can be unfolded; at least one of a first fastener (6a) secured to the first pivoting leaf (2a) and arranged so as to be connected to a first strand of the bracelet, and a second fastener (6b) secured to the second pivoting leaf (2b) and arranged so as to be connected to a second strand of the bracelet. The clasp according to the invention also comprises a fastener body (4) arranged on at least one of the first and second pivoting leaves (2a, 2b), the or each first and second fastener (6a, 6b) being connected to the corresponding fastener body (4) which is able to be moved in the length direction of the corresponding pivoting leaf (2a, 2b) in order to be locked in various positions along said leaf (2a, 2b).
