Abstract (en)

[origin: US2013000663A1] A cosmetic applicator brush head has a plurality of molded tines, each with a main shaft and a first and a second branch extending from the shaft. The first branch extends at a point between the base of the shaft and the free end of the shaft. The second branch extends from the shaft at a point between the base of the shaft and the first branch. The first and second branches extend in a radial direction from the shaft at an angle of 5° to 90° relative to a longitudinal axis of the shaft.
