Abstract (en)

[origin: WO2013000774A1] The invention relates to a processing container (1) comprising a stirring bowl (2) and a lid (3) that can be attached to the stirring bowl (2). The stirring bowl (2) has a counter-coupling device on the stirring bowl outer face for removably fixing to a coupling device of a kitchen appliance (11). The lid closes the stirring bowl in a liquid-tight manner when the lid is attached to said stirring bowl. The invention further relates to a kitchen set comprising the processing container and a kitchen appliance (11) with a coupling device, said counter-coupling device of the stirring bowl (2) of the processing container (1) being removably coupleable to the coupling device of the kitchen appliance (11) in order to attach the stirring bowl (2) to the kitchen appliance (11). The processing container (1) according to the invention is easily suitable for both the preparation as well as the storage of food. The processing container is simple and inexpensive to produce, can be handled effortlessly, and is easy to clean.
