Abstract (en)

[origin: WO2013001460A1] A guide for lifts comprises a base portion, two boundary edges placed at opposite side ends of the base portion and a central protrusion emerging from the base portion; the guide further comprises at least one mass- redistribution portion formed in the base portion and adapted to lighten the base portion at an intermediate part thereof included between the central protrusion and at least one boundary edge, and also adapted to make the base portion heavy at a localised end part thereof in the vicinity of at least one boundary edge.
