Abstract (en)

[origin: WO2013000004A1] The invention relates to a façade construction for thermally insulating and cladding external walls of buildings, comprising a thermal insulation layer (2) arranged on the external wall (1) of a building, a watertight layer and at least one cladding panel (6), wherein the cladding panel (6) is adhesively secured to the watertight layer by way of at least one adhesive portion and the watertight layer comprises a watertight reinforcement (3) mounted on the thermal insulation layer (2) and/or a watertight coating (4) of the/a reinforcement (3) mounted on the thermal insulation layer (2).
