Abstract (en)
[origin: WO2013000834A1] The invention relates to a fuel injection valve (11), to an electrical circuit (100), and to a method. A first connection (70a) of a sensor device (70) is connected to a connection (HS) of an actuator (80). An additional connection (70b) of the sensor device (70) is connected to a reference potential (88). The sensor device (70) comprises a sensor (26) and a series resistor (90) connected in series with the sensor (26).
