Abstract (en)

[origin: WO2013003610A1] Provided are methods and systems for facilitating mobile communications of a subscriber associated with a home network roaming in a visited network. The method includes receiving, at a service node, a registration message by the subscriber to register with the visited network. The method further includes facilitating, via the service node, completion of the subscriber's registration in the visited network. Further, the method includes facilitating, via the service node, a mobile communication of the subscriber in the visited network using a local number.
