Abstract (en)

[origin: EP2727880A1] The three-dimensional micro-mechanical component that is made of a base material provided with carbon (C) or silicon (Si), glass-ceramics or aluminum-containing glass-ceramics. A chamfer (41,42) is placed at specific angle in the edges of the surface. The chamfer has specific surface roughness. The base material composed of silicon, Silicon dioxide (SiO<sub>2</sub>), quartz, Silicon carbide (SiC), diamond, diamond-like carbon (DLC), or crystalline diamond made of sapphire or ruby. An independent claim is included for a method for producing a micromechanical component.
