Abstract (en)

The present invention relates to a laundry treating machine (10) comprising a casing (12) including a basement portion (14). The basement portion (14) comprises at least one seat (16) for receiving an electric motor (36). An electric and/or electronic control circuit (28) for controlling the electric motor (36) is arranged in a first position inside the casing (12). A supporting housing (30) is provided for receiving an electrical component (22; 34) of the control circuit (28). The electrical component (22; 34) is electrically connected to the control circuit (28). The electrical component (22; 34) is arranged in a second position and inside the casing (12). The second position is spaced apart from the first position. The second position is arranged close to the electric motor (36).
