Abstract (en)
[origin: WO2013004652A1] The invention relates to the use of substituted isoquinolinones, isoquinolindiones, isoquinolintriones and dihydroisoquinolinones of general formula (I) or in each case salts thereof, wherein the radicals in general formula (I) correspond to the definitions given in the description, for enhancing stress tolerance in plants against abiotic stress, for boosting plant growth and/or for increasing plant yield, and to special methods for producing the aforementioned compounds.
