Abstract (en)  
[origin: WO2013005166A1] A suitcase (1 ) has a suitcase body (2) at least partially formed by a shell (10) comprising a first main surface (101 ) and at least three lateral surfaces (102, 103, 104) extending at an angle from sides of said first main surface (101 ). The first main surface (101 ) and the at least three lateral surfaces (102, 103, 104) belong to a single cut piece (200) of sheet-like flexible material. The first main surface (101 ) and the at least three lateral surfaces (102, 103, 104) are shaped and the at least three lateral surfaces (102, 103, 104) are at least partially joined together so that said shell (10) forms a self-supporting structure.
