Abstract (en)
[origin: WO2013006126A1] The present invention relates to a golf tee holder (1) comprising an upper side (T) and a bottom side (B) and a side wall (2) extending between the upper and bottom side, whereby the upper side comprises an upper surface (3), which comprises a cut (5) and a centre hole (4). The centre hole is positioned substantially in the centre of the upper surface. The cut through the entire upper surface comprises a first part as a straight cut (5a) and a second part as a curved cut (5b). Two outside walls (6) extend vertically on both sides of the cut when the cut through the upper surface is in a closed position. The outside walls are connected by a bottom surface (7) over a distance (d3), which includes at least the centre hole and the straight cuts. The outside walls are configured to be separated at an angle (a1).
