Abstract (en)

[origin: WO2013023860A1] The invention relates to a construction profile, in particular a T, C, U, V, H, L, M, W, Q or hat profile, having an in particular metallic, elongated base body (14). The base body comprises a center region (15) extending in the longitudinal direction and designed substantially closed and at least two longitudinal regions (16) extending on both sides of the center region (15). Openings (13) expanded crosswise to the longitudinal extension of the base body (14) are arranged in the longitudinal regions (16). A profile recess (18) or rise having lateral guide surfaces (19) and extending in the longitudinal direction of the base body (14) over the entire length thereof is formed in the center region (15) of the base body (14). The invention further relates to a method and to a device for producing such a construction profile.
