Abstract (en)

[origin: WO2013004723A1] The invention relates to a roll and in particular to a drying cylinder (10) having a coating (14) of the roll shell on the working area (13) intended for contact with a paper web guided thereover, which are designed in such a way that the adhesion of the paper web to be dried is lower at the edge zones of the working area (13) than in the areas (11) of the roll shell surface between the edge zones (12).
