Abstract (en)

[origin: WO2013007878A1] The invention relates to a fastening member for fastening of elements, which fastening member has at least a first side (3) and a second side (2), wherein the first side (3) of the fastening member (1) has at least two transversal extensions (12a, 12b). The fastening member has at least one longitudinal extension (11 a, 11b), and at least two holes (10a, 10b, 10c), in the longitudinal axis of the fastening member. The invention further relates to a system and a method for manufacturing a fastening member used for fastening of elements, and an arrangement and a use for fastening elements.
