Abstract (en)  
[origin: WO2013004685A2] The present invention refers to a cooling and/or freezing apparatus, particularly to a cooling apparatus having at least two compartments that can be closed with one door only, and a cooling system comprising at least one compressor, at least one condenser, at least one evaporator, at least one blower for circulating air in said compartments, and at least one means for regulation of refrigerant flow. Spaced from a rear side (5) of said apparatus there is arranged a vertical partition wall (6) extending through said compartments (2, 3). Evaporators (8, 9) are arranged vertically with regard to said apparatus, one above the other, in a spacing (7) between said rear side (5) and said wall (6). Each compartment (2, 3) is provided with at least one shelf (10, 12) and/or at least one pull-out drawer (11) to receive and store goods.
